Rationalist Criticism of Greek Tragedy James E. Ford 2005 Literary critical revolutions-radical shifts in interpretation and evaluation of literary works and their authors-are among the most interesting of cultural phenomena. In order to gain greater understanding of the mechanisms of all critical revolutions, Rationalist Criticism in Greek Tragedy examines the late nineteenth-century 'rehabilitation' of Euripides. Some of the factors which contributed to the Euripidean revolution are well known, but one which is not-one which has been generally forgotten, when it has not actually been denied-is the role of Rationalist Criticism. Rationalist Criticism, founded and dominated by infamous Cambridge University Classicist and English scholar A. W. Verrall, was generally deprecated by mainstream classicists when it first appeared, and those who happen to come upon it today tend to treat it dismissively-a tendency the great classicist Eduard Fraenkel thought 'should be strongly resisted.' The influence of Rationalist Criticism-inside and outside of classical studies-has been much greater than has been generally supposed. James E. Ford makes the case for the larger significance of what Verrall and the Rationalist Critics were doing within the history not just of Euripidean criticism but of literary studies generally. Ford reads the rationalists on their own terms, drawing on the disciplines of the history of scholarship and the history and theory of literary criticism making this study unique. It should appeal to anyone interested in intellectual history, especially instances of significant intellectual changes (a la Kuhnian revolutions), and, especially, changes in the interpretation and evaluation of authors and their works. The work should be of specific interest to classicists, academic historians, and critical theorists.

The Other Road Jack D. Kendall 1996 Over two thousand years of sacred history are covered in the fifty chapters of the scriptures that comprise the book of Genesis. Therein is found a rich and informative panorama, carrying us from the story of Creation through the history of the early patriarchs. A portion of the book of Revelation also presents the broad sweep of events associated with the great cosmic conflict between good and evil which has been raging for thousands of years. From the outbreak of the war in heaven, the Apocalypse directs our vision to the glories of the earth made new, following the ultimate triumph of truth and righteousness. The Other Road is also a book which, in relatively few chapters, brings again to view the great spiritual conflict described in Holy Writ; a conflict affecting the rise and fall of nations; a conflict which will continue until the end of time; and a conflict that will ultimately decide the destiny of every human being. -- from introduction.

‘Being Towards Death’ Sylvie Avakian 2021-04-19 This book draws the philosophical contribution of Martin Heidegger together with theological-spiritual insights from the East, especially that of Nikolai Berdyaev. Thus, it brings into dialogue the West with the East, and philosophy with theology. By doing so, it offers Christian theology an existential-spiritual language that is relevant and meaningful for the contemporary reader. In particular, the work explores Heidegger’s ‘being towards death’ (Sein zum Tode) as the basis for theological-philosophical thinking. Only the one who embraces ‘being towards death’ has the courage to think and poetize. This thinking, in turn, makes ‘being towards death’ possible, and in this circular movement of thinking and being, the mystery of being reveals itself and yet remains hidden. Since the work aims at demonstrating ‘being towards death’ through language, it transitions away from the common formulations and traditionally accepted ways of writing (dogmatic) theology towards an original, philosophical reflection on faith and spirituality. At different points, however, the work also retrieves the profound thoughts and theologies of the past, the insightful creativity of which cannot be denied.

Kafka: A Very Short Introduction Ritchie Robertson 2004-10-28 'When Gregor Samsa awoke one morning from troubled dreams he found himself transformed in his bed into a monstrous insect ...' So begins Franz Kafka's most famous story Metamorphosis. Franz Kafka (1883-1924) is among the most intriguing and influential writers of the twentieth century. During his lifetime he worked as a civil servant and published only a handful of short stories, the best known being The Transformation. All three of his novels, The Trial, The Castle, and The Man Who Disappeared [America], were published after...
his death and helped to found Kafka's reputation as a uniquely perceptive interpreter of the twentieth century. Kafka's fiction vividly evokes bizarre situations: a commercial traveller is turned into an insect, a banker is arrested by a mysterious court, a fasting artist starves to death in the name of art, a singing mouse becomes the heroine of her nation. Attending both to Kafka's crisis-ridden life and to the subtleties of his art, Ritchie Robertson shows how his work explores such characteristically modern themes as the place of the body in culture, the power of institutions over people, and the possibility of religion after Nietzsche had proclaimed 'the death of God'. The result is an up-to-date and accessible portrait of a fascinating author which shows us ways to read and make sense of his perplexing and absorbing work.

America Writes Its History, 1650–1850 Jude M. Pfister 2014-05-30 By turns irreverent, sympathetic and amusing, America Writes Its History, 1650–1850 adds to the public discourse on national identity as advanced through the written word. Highlighting the contributions of American writers who focused on history, the author shows that for nearly 200 years writers struggled to reflect, or influence, the public perception of America by Americans. This book is an introduction to the development of history as a written art form, and an academic discipline, during America’s most crucial and impressionable period. America Writes Its History, 1650–1850 takes the reader on a historical tour of written histories—whether narrative history, novels, memoirs or plays—from the Jamestown Colony to the edge of the Civil War. What exactly did we, as Americans, think of ourselves? And more importantly; What did we want non-Americans to think of us? In other words, what was (and is) history, and who, if anyone, owns it?

The Radical Isaac Adi Mahalel 2023-04-01 Yiddish and Hebrew writer I. L. Peretz (1852–1915) was a major leader of Eastern European Jewry in the years prior to World War I, and was deeply involved in Jewish politics and communal life throughout his lifetime. In The Radical Isaac, Adi Mahalel examines a central part of his life and art that has often been neglected, namely, his close alignment with the needs of the Jewish working-class and his deep devotion to progressive politics. Although there have been numerous studies of Peretz and his work, this very central component of his life nonetheless remains severely understudied. By offering close readings of the "radical" Peretz, Mahalel recasts the way political activism is understood in scholarly evaluations of the writer’s work. Employing a partly chronological, partly thematic scheme, Mahalel follows Peretz’s radicalism from its inception and then through the various ways in which it was synchronically expressed during this intense period of history.

Science and Religion: A Very Short Introduction Thomas Dixon 2008-07-24 The debate between science and religion is never out of the news: emotions run high, fuelled by polemical bestsellers like iThe God Delusion/i and, at the other end of the spectrum, high-profile campaigns to teach 'Intelligent Design' in schools. Yet there is much more to the debate than the clash of these extremes. As Thomas Dixon shows in this balanced and thought-provoking introduction, a whole range of views, subtle arguments, and fascinating perspectives can be taken on this complex and centuries-old subject. He explores not only the key philosophical questions that underlie the debate, but also highlights the social, political, and ethical contexts that have made 'science and religion' such a fraught and interesting topic in the modern world. Along the way, he examines landmark historical episodes such as the Galileo affair, Charles Darwin's own religious and scientific odyssey, the Scopes 'Monkey Trial' in Tennessee in 1925, and the Dover Area School Board case of 2005, and includes perspectives from non-Christian religions and examples from across the physical, biological, and social sciences.

El sentido de la vida Terry Eagleton 2008-02-21 A ver, ¿cuál es el sentido de la vida? En este agudo, vigoroso y estimulante librito, Terry Eagleton repasa cómo se han enfrentado a la peligrosa cuestión los filósofos y escritores de siglos anteriores – desde Shakespeare y Schopenhauer hasta Marx, Sartre y Beckett. Con mordacidad y sentido del humor, Eagleton pone de manifiesto, con ironía y rigor intelectual, hasta qué punto la pregunta se ha vuelto especialmente problemática en la era contemporánea. En lugar de ser honestos y confesar que la desorientación impregna nuestras vidas, nos refugiamos en un sinfín de actividades a cuál más disparatada: desde el deporte como religión atea, pasando por el sexo hasta las religiones New Age, sin olvidar la trampa del fundamentalismo. Terry Eagleton lanza una mirada fascinante al más cautivador de los interrogantes, y expone su propia respuesta.
